## POLYNUCLEOTIDES ENCODING ANTIGENIC HIV TYPE C POLYPEPTIDES, POLYPEPTIDES AND USES THEREOF

## Abstract of the Disclosure

10

5

The present invention relates to polynucleotides encoding immunogenic HIV type C Pol, Gag- and/or Env-containing polypeptides. Uses of the polynucleotides in applications including DNA immunization, generation of packaging cell lines, and production of Pol, Gag- and/or Env-containing proteins are also described.
